What is the Green Home Loan Program?

The objective of the Green Home Loan Program is to reduce energy usage and fossil fuel emissions in our communities by improving energy efficiency in our homes. This will aid the City of Oklahoma City in achieving the overall goal of becoming a leader in energy efficiency and sustainability by reducing both the City's energy consumption and greenhouse gas emissions by 10% by 2015. The Green Home Loan Program is being offered through the Community Action Agency of Oklahoma City and Oklahoma/Canadian Counties, Inc. in partnership with the City of Oklahoma City to help homeowners make these energy saving changes to their homes.

Why you should consider a home energy loan?

If you are a homeowner considering making "green" home improvements, why not consider the Green Home Loan from Community Action Agency? You'll save money and make your home more comfortable while helping the environment. Implementing energy efficiency improvements can lower utility bills, increase home value and market attractiveness, and address many common maintenance issues.

Contact the Community Action Agency today to request an application!

Loan Guidelines

Loan Limits: Loans will be considered up to \$10,000.

Loan Terms: Loans will have up to a 36 month repayment schedule.

Loan Rates: Fixed 3% Interest Rates
